# Furniture Clear II

Modification of furniture Clear

# Why are we introducing this novelty?

- By modernizing our furniture we bring new design elements that better match current trends and customer requirements → we want to maintain our position on the market and attract new customers.
- We target the modern interiors segment and address a growing group of customers looking for timeless furniture without compromise.

# Design innovation

- The shorter handle gives the furniture a minimalist look without losing functionality. The handle is only shortened - the shape, material and colour remain the same.
- The main drawer of the vanity unit is newly extended to the full length of the cabinet.
- The internal organiser, which has also been newly extended, will allow customers to make even better use of the entire space and to store small items clearly.
- For the SB tall cabinet, the handle position has been changed from horizontal to vertical.
- The depth of the tall cabinet is now 250 mm (reduced from the original 350 mm)
- The interior of the SB cabinet has been redesigned - no drawer, the top part includes 3 glass shelves. The lower part remains separated by a fixed shelf.

# Clear II

# Furniture SD Clear II 800

## Furniture SD Clear II 800

Material	impregnated board MFPB and MDF
Body colour	white gloss
Door colour	white gloss
