

Concrete Sinks Installation

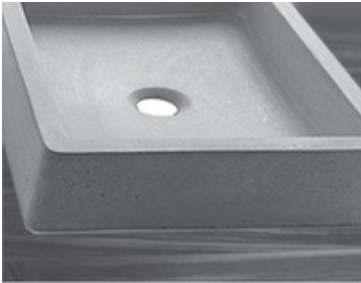

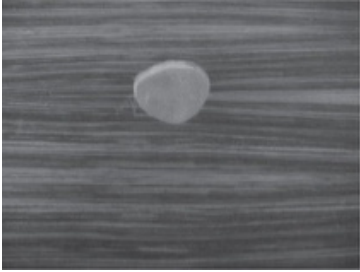

Caution!

Concrete is a fragile material, please unpack your sink and handle it with care. Use protective blankets or sheets for floors and other surfaces that the item will be resting on before it is installed as the bottom can cause scratches.

Damage caused during installation is not covered by warranty.

Installation for Vessel Sinks

1. Refer to the sink specs for proper cutout size. For most above-counter and vessel sinks a standard cutout of 4"-6" will work. The cutout has to be just large enough so that the drain assembly can be tightened directly onto the porcelain.

IMPORTANT!

The drain assembly does not attach the sink to the countertop.

2. Temporarily position the sink over the cutout and make sure that it is aligned properly, leaving clearance for supply lines, drain, and faucet assemblies.

3. Make marks with a pencil on the countertop and sink as a guide for installation.

4. Install the drain and faucet assemblies onto the sink as applicable.

CAUTION!

No metal part should come into contact with concrete - sealant or gasket must always be present in between concrete surface and metal parts. Drains should be installed with plumber's putty and hand-tightened only.

5. Turn the sink upside down and apply a small bead of silicone around the bottom edge of the sink, following the instructions on the label.

6. Place the sink onto the desired location, aligning it with the guide marks, and press down to ensure a tight seal. Let the sealant set and then connect the supply lines and drain pipes.

Cleaning and Care

For best results, please care for this product in accordance with the following instructions: - Only use warm water

and a mild detergent (i.e. dishwashing soap) for cleaning. - If another cleaner is used, check the label to make sure that it is safe for use on the material being cleaned and always test in an inconspicuous area first.

- Make sure to wipe any excess cleaners off with a damp sponge or cloth and then rinse with water.

- Dry the surface with a soft cloth until dry after each use.

- Never use abrasive materials or cleaners that contain ammonia, bleach or acid, since they can cause damage to the finished surface.

We would like to thank you for your purchase and are confident that you will be able to enjoy our products for many years to come!
